

Guide to Using the BitCerealMarket Escrow

The first thing you need to do is to have a browser with MetaMask or TrustWallet, preferably MetaMask, and click on the connect wallet button

Then you must go to the Escrow section.

With your wallet connected, the information will not appear if you have not yet completed any sale. Within the information boxes, the seller's address, buyer's address, the amount to be paid, and most importantly, the ID will appear.

Remember that we charge a 10% fee per transaction.

A 10% fee is charged per transaction.

When you are going to make a purchase, in the ID section, it will change to your transaction number, which you must pass on to the seller so that they can verify and deliver the product to you.

You are being attempted to be robbed at the market, don't worry, all of our transactions are secure. Just communicate with the following email "BitCerealMarket@protonmail.com" within 24 hours with your purchase ID and screenshots, and we will resolve it for you.

Price: 0 Matic

Seller: 0x00...0000

Buyer: 0x00...0000

ID: 0

Approve: Not Approved

A 10% fee is charged per transaction

You must have Matic. To make a purchase, you must first put your money in escrow so that the seller can deliver your products. Remember, the money will not be sent to the seller until you approve the transaction, but you cannot scam once you send the money to the escrow. If the buyer gave you the products, they can file an appeal and if they prove that they delivered the products, the money will be released to them. If they did not deliver the products, your money will be refunded, but there is a 10% fee for using the escrow. It's better to pay the fee than to risk losing everything.

Now let's create a transaction. Identify the inputs that are below the information boxes.

The image shows a transaction form on a purple background. It contains five input fields, each with a placeholder text and an information icon (a green circle with a white 'i'). The first four fields are grouped by a red rectangular border. Below these fields are three yellow buttons with icons and text: a shopping basket icon for 'Purchase', a document icon for 'Approve Transaction', and a gear icon for 'CheckID'.

Enter the payment amount in Matic

i "Enter the seller's price in Matic.

Enter your wallet address

i Enter your Metamask or Trustwallet Address.

Enter the seller wallet address

i Enter the Address that the seller provided you.

Enter the transaction ID

i Don't input anything in this format until you're ready to approve the transaction with your purchase ID.

Purchase

Approve Transaction

CheckID

You have 4 inputs, but you will only fill in 3 of them to create a transaction. We will fill them in step by step.

The first input is for the seller's price. Remember that the price is not in Mexican pesos, dollars, euros, bitcoin. The payment method used in the BitCerealMarket escrow is the Matic cryptocurrency. To know the price, value, or convert your currency or the seller's price to Matic, you can use listings with CoinMarketCap or exchanges such as Binance, gate.io, etc. This way, you can know the amount to pay in Matic and put it in the input. There are no limits or minimums for payments, just remember that the 10% fee is ours for using the escrow.

In the example, we will make a payment of less than 1 Matic.

Enter the payment amount in Matic

"Enter the seller's price in Matic.

Enter your wallet address

Enter your Metamask or Trustwallet Address.

Enter the seller wallet address

Enter the Address that the seller provided you.

Enter the transaction ID

Don't input anything in this format until you're ready to approve the transaction with your purchase ID.

Purchase Approve Transaction CheckID

In the second input, you will have to put your Metamask wallet that you will be using to send the Matic.

"The address should be unique to the Polygon network. If you use an address that is not compatible with Polygon Matic, the funds will be lost and cannot be recovered in any way."

Example: Oxyourwalet12

It's very important that the address belongs to the Matic network and to a Metamask wallet. In decentralized applications, they cannot know the information or identity of individuals.

Enter the payment amount in Matic

"Enter the seller's price in Matic.

Enter your wallet address

Enter your Metamask or Trustwallet Address.

Enter the seller wallet address

Enter the Address that the seller provided you.

Enter the transaction ID

Don't input anything in this format until you're ready to approve the transaction with your purchase ID.

Purchase Approve Transaction CheckID

The second one is the seller's address

"The address should be unique to the Polygon network. If you use an address that is not compatible with Polygon Matic, the funds will be lost and cannot be recovered in any way."

Example: Oxyourwalet12

It's very important that the address belongs to the Matic network and to a Metamask wallet. In decentralized applications, they cannot know the information or identity of individuals.

Enter the payment amount in Matic

 "Enter the seller's price in Matic.

Enter your wallet address

 Enter your Metamask or Trustwallet Address.

Enter the seller wallet address

 Enter the Address that the seller provided you.

Enter the transaction ID

 Don't input anything in this format until you're ready to approve the transaction with your purchase ID.

 Purchase

 Approve Transaction

 CheckID

The fourth input is not filled, that input is left blank to approve or verify transactions in the future

0.001

 "Enter the seller's price in Matic.

0x334f8c76275574e57f2f19ad42775453dbd82ce7

 Enter your Metamask or Trustwallet Address.

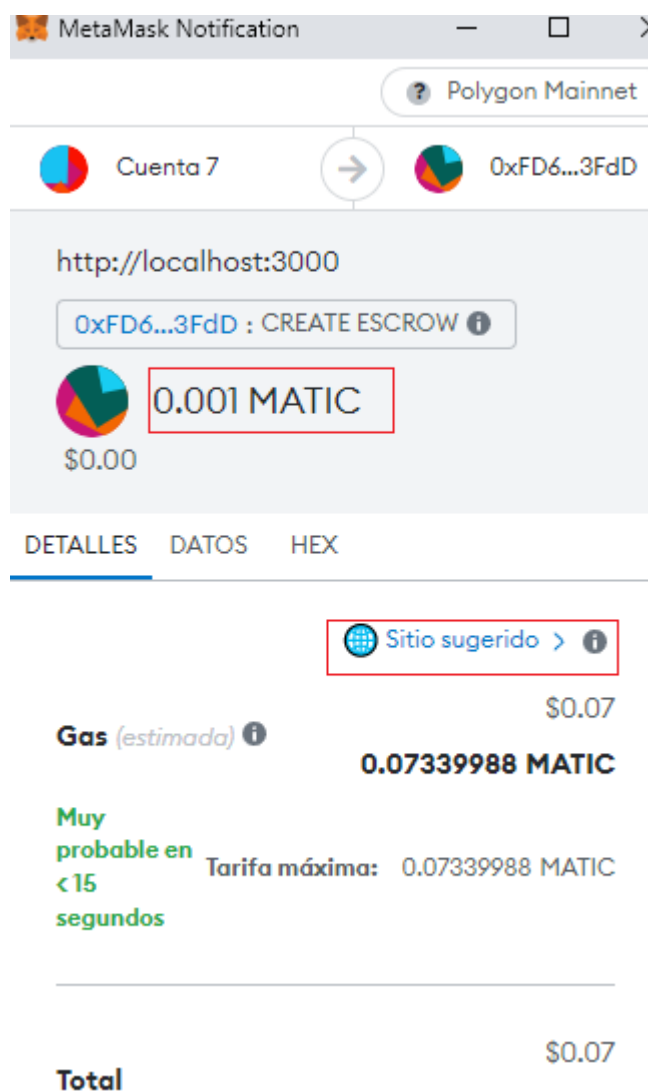

0xde86a794805d49112136cd0Ed426E088eB3f7C12

 Enter the Address that the seller provided you.

Enter the transaction ID

 Don't input anything in this format until you're ready to approve the transaction with your purchase ID.

When you have filled in the data as in the example, you have to click on the buy button, which is identified with the image of a basket. After that, a window will open for you to confirm the transaction.

It is recommended that you set the gas to "aggressive" to make the transaction faster, but this step is optional

-------------------------	--	---

¿Quiere [Más información](#) sobre gas?

Once you have selected the aggressive mode in Metamask, you will need to confirm the transaction. It is important to have enough Matic to cover the transaction. Please note that any sale or transaction generates a fee, and there is no transaction that is exempt from fees.

We are not responsible for any transaction that you generate. We are only a secure escrow service for transactions. Human errors such as network errors, pricing mistakes, and incorrect addresses are solely the responsibility of the users.

Confirmar

When accepting the transaction, you accept what you are buying and understand that you are solely responsible for any legal actions. BitCereal does not and will not cooperate with authorities from any country and is a decentralized service where everyone is responsible for their own actions.

Once the transaction is confirmed, the balances will be updated and you will see the information of the transaction. You must immediately pass the transaction ID to the seller.

It would be updated as follows.

You are being attempted to be robbed at the market, don't worry, all of our transactions are secure. Just communicate with the following email "BitCerealMarket@protonmail.com" within 24 hours with your purchase ID and screenshots, and we will resolve it for you.

 Price: 0.001 Matic

 Seller: 0xde...7C12

 Buyer: 0x33...2cE7

 ID: 2

 Approve: Not Approved

 A 10% fee is charged per transaction.

If you encounter the problem that the escrow is not updated, don't worry, just refresh the page again. As it works through edges, nodes, and blockchain, the information is real-time, so it may take a little while to update.

It is important that you pass the transaction ID to the person who is your seller so that they can track the transaction as follows:

2

 Don't input anything in this format until you're ready to approve the transaction with your purchase ID.

 Purchase

 Approve Transaction

 CheckID

This is how the seller can track the transaction: the seller will put the ID you provided in the ID input, and then use the checker button.

localhost:3000 dice

Transaction ID: 2

Buyer Address: 0x334f8c76275574E57f2F19ad42775453DBD82cE7

Seller Address: 0xde86a794805d49112136cd0Ed426E088eB3f7C12

Transaction Status: false

Price: 0.001 Matic

Transaction fees: 0.0001 Matic

Aceptar

The transaction details will appear. The meaning of 'false' is that the buyer has not yet approved the transaction, as shown in the image.

localhost:3000 dice

Transaction ID: 2

Buyer Address: 0x334f8c76275574E57f2F19ad42775453DBD82cE7

Seller Address: 0xde86a794805d49112136cd0Ed426E088eB3f7C12

Transaction Status: true

Price: 0.001 Matic

Transaction fees: 0.0001 Matic

Aceptar

Once the buyer approves the transaction, the status will be shown as true.

The Buyer must approve the transaction in the following way:

 Enter your Metamask or Trustwallet Address.

Enter the seller wallet address

 Enter the Address that the seller provided you.

2

 Don't input anything in this format until you're ready to approve the transaction with your purchase ID.

 Purchase

 Approve Transaction

 CheckID

They confirm the transaction on Metamask as we explained before.

You are being attempted to be robbed at the market, don't worry, all of our transactions are secure. Just communicate with the following email "BitCerealMarket@protonmail.com" within 24 hours with your purchase ID and screenshots, and we will resolve it for you.

 Price: 0.001 Matic
